New

A WhatsApp message brings her to the Lounge

AS TODAY

- WhatsApp is already how we reach speakers (the WhatsApp offer in the Lounge).

WHAT'S NEW

- One message per request, from WillpowerLab's number, with a link that opens her Lounge.

NEW WORDS, WAITING FOR YOUR OK

Sarah, a customer of Invita, asks for your advice.

Open your Lounge

DECIDED

- Ariel is told on WhatsApp: one message per request, with a link to her Lounge.

TO DECIDE BEFORE BUILDING

Q1 How fast must she answer (the widget promises "within a day")? What happens when she doesn't: a reminder, another trichologist, a note to Invita?

▶ **Before we build it: 16 questions**

The Lounge and the processing wait are screenshots of today's app. The recording screen, the walk and the Ideal Text page are drawn at 390 × 844 from today's screens (/dev/recording, /dev/feedback-walk, /dev/deck). Invita's treatments and prices are from invitaheadspa.com; the product's name and price are not known yet. The customer and the photo are made up.

Ariel's Lounge

A customer of Invita Head Spa asks on the site. Ariel answers in her own WillpowerLab Lounge, as a Take. Tap inside the phone. The customer's side is prototype 1.

Real, with new parts

The request is the Lounge's one ask (E1, D4)

AS TODAY

- The Lounge, its header and the message box.
- The ask's footer: the grey card and the pair, Not now and the black button (SymmetricPair).

WHAT'S NEW

- Will's bubble quotes the customer: the photo, the words, the last digits of the number. With no first name: "A customer of Invita Head Spa asks…"
- Answer opens the picker. Not now leaves it in the thread for later.

NEW WORDS, WAITING FOR YOUR OK

Sarah, a customer of Invita Head Spa, asks for your advice.

Gets your answer on WhatsApp

Answer

DECIDED

- The widget gets one optional field, the customer's first name. Without it, Ariel sees "a customer".

TO DECIDE BEFORE BUILDING

Q2 Ten requests waiting: one ask at a time in the thread (as drawn), or a list she picks from?

Q3 Photos: one or several? Kept how long after the answer (30 days was proposed)? Who at Invita may see them?

Ariel's Lounge

A customer of Invita Head Spa asks on the site. Ariel answers in her own WillpowerLab Lounge, as a Take. Tap inside the phone. The customer's side is prototype 1.

New

Each thing she picks is a slide (N226)

AS TODAY

- Drawn in the shape of "Choose your helper words": the title, the line under it, the box, the black button and the grey link.

WHAT'S NEW

- Invita's five treatments with their real prices, and the products. Her picks become the slides she talks over, the request always first.
- Just the request: she talks over the photo alone.

NEW WORDS, WAITING FOR YOUR OK

What do you recommend?

Each one you pick is a slide while you talk. Sarah can book or buy it from your answer.

Record over 3 slides

Just the request

TO DECIDE BEFORE BUILDING

Q4 Invita's list: who enters the treatments and products and keeps the prices right (Invita, or us from their site)? Which products, real names and prices?

Q5 Prices differ by spa ($138 vs $148). The slide shows the range; the customer sees their spa's price at booking. Right?

New

She learns what her answer did

WHAT'S NEW

- When the customer books and pays, or buys, Will tells her in the thread. The outcome is kept with the pair, for Invita's model later (N224).

NEW WORDS, WAITING FOR YOUR OK

Sarah booked the Deep Scalp Treatment at Invita Las Vegas, Thu 12 Nov, and paid $138.

TO DECIDE BEFORE BUILDING

Q11 How does a paid booking reach Invita's calendar (which system do they use), and how are Ariel's days at each spa kept?

Q12 Stripe Connect: does Invita have a Stripe account? Who pays the fees? Do we take a share?

Q13 Invita's cancellation and refund policy, and shipping for products (who ships, to where, how much)?

▶ **Before we build it: 16 questions**

The Lounge and the processing wait are screenshots of today's app. The recording screen, the walk and the Ideal Text page are drawn at 390 × 844 from today's screens (/dev/recording, /dev/feedback-walk, /dev/deck). Invita's treatments and prices are from invitaheadspa.com; the product's name and price are not known yet. The customer and the photo are made up.

Ariel's Lounge

A customer of Invita Head Spa asks on the site. Ariel answers in her own WillpowerLab Lounge, as a Take. Tap inside the phone. The customer's side is prototype 1.

- Real app
- Real, with new parts
- New

A REQUEST COMES IN

- WhatsApp tells her
- The request is her ask
  - The photo, full screen

SHE ANSWERS WITH A TAKE

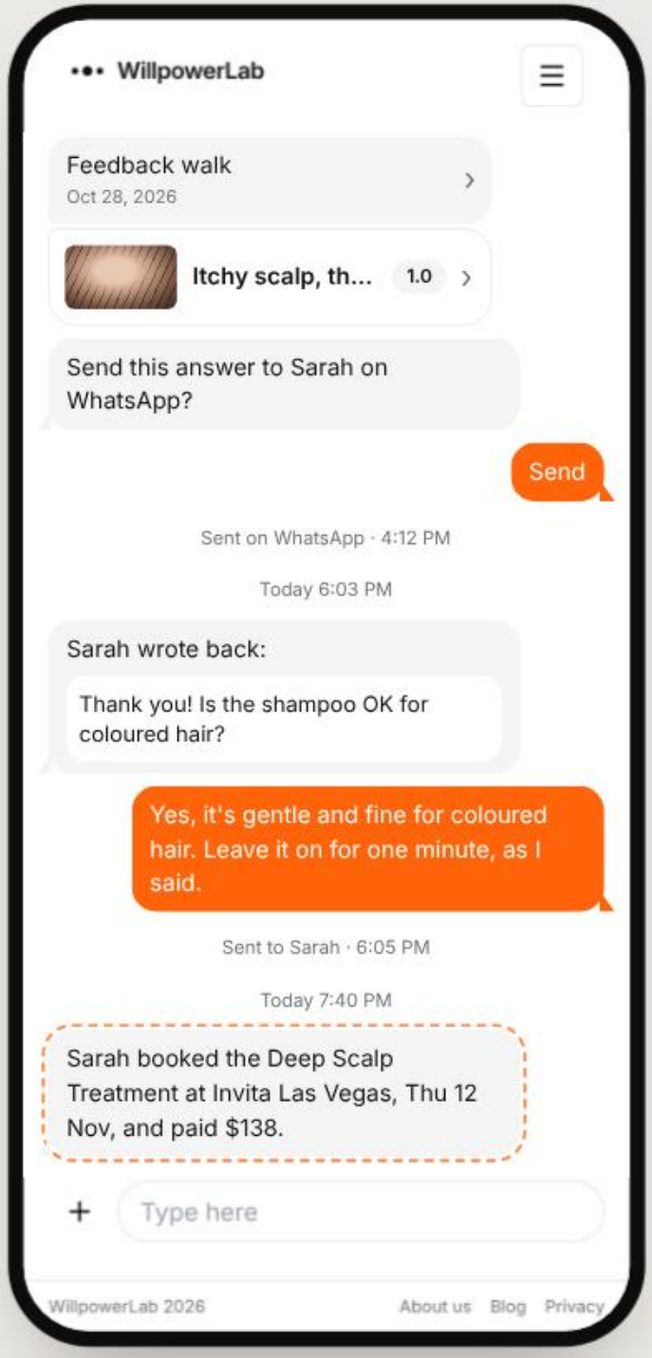

- What she recommends
- Recording, camera off
- Processing
- Send it, then the walk

HER FEEDBACK, AFTER

- The walk: good job
- The walk: clearer version
- The walk ends
- The Ideal Text

AFTER

- Sarah writes back
- **Booked and paid**

☑ Show what to tap ☐ Underline new words

New

She learns what her answer did

WHAT'S NEW

- When the customer books and pays, or buys, Will tells her in the thread. The outcome is kept with the pair, for Invita's model later (N224).

NEW WORDS, WAITING FOR YOUR OK

Sarah booked the Deep Scalp Treatment at Invita Las Vegas, Thu 12 Nov, and paid $138.

TO DECIDE BEFORE BUILDING

Q11 How does a paid booking reach Invita's calendar (which system do they use), and how are Ariel's days at each spa kept?

Q12 Stripe Connect: does Invita have a Stripe account? Who pays the fees? Do we take a share?

Q13 Invita's cancellation and refund policy, and shipping for products (who ships, to where, how much)?

▼ **Before we build it: 16 questions**

1. How fast must she answer (the widget promises "within a day")? What happens when she doesn't: a reminder, another trichologist, a note to Invita?
2. Ten requests waiting: one ask at a time in the thread (as drawn), or a list she picks from?
3. Photos: one or several? Kept how long after the answer (30 days was proposed)? Who at Invita may see them?
4. Invita's list: who enters the treatments and products and keeps the prices right (Invita, or us from their site)? Which products, real names and prices?
