Ember & Air

Ember & Air is an example company: a heat pump installer with about 40 people and three crews. Every question is a lead worth thousands, and the know-how sits in a few senior heads. Five people take part: a customer, a junior who answers, a senior who checks and teaches, the speaking coach (with Will, the AI coach), and the owner.

Three ways in

Questions come the way they come today. The answer goes back the same way, as a link.

Forward
Forward any email or WhatsApp message to ask@emberandair.willpowerlab.com. It arrives as a chat. Nothing to set up.

Link
Put "Ask our advisor" on your site, your contact form or your email signature. The customer lands in the chat.

Connect
Later, if it pays: connect your inbox or WhatsApp Business, and questions arrive by themselves.

Three ways in

WillpowerLab joins the way you already work; it replaces nothing. Like a Calendly or a Loom link, it is a link that works in any channel.

Whichever way a question comes in, it becomes a chat with a customer, and the answer goes back the same way: a link to the advisor's voice, the words, and Book or Buy.

Your turn

How do customers' questions reach you today?

We start with the way you already work, and connect it later if it pays.

Will One thing, at 0:12: slow down on "the grant". It is what Mark asked about.

JOSH · JUNIOR HEATING ADVISOR

Will picks one moment

The loop: spot the right moment, then give the one piece of feedback with the most leverage. The junior sees one line; this is what Will read to choose it:

- The chat: a customer, new, from the website.
- The stakes: a first answer to a money question, the grant.
- Josh's last Takes: he rushes the words that matter most.
- His plan this week: pace.

So, one moment (the grant, at 0:12) and one intervention, before he sends: a single line. Will judges how it is said, never what is advised; that is the senior's job.

After: Mark's reply, or his booking, tells Will whether it worked.

From the photos most of your radiators can work with a heat pump; two may need to be bigger. A 1990s semi with a gas boiler is the kind of home the grant is for, and the survey confirms it in an hour, at no cost. Meanwhile, a smart thermostat cuts the gas bill right away.

A question inside the team

No customer: the junior asks the senior. The senior answers with a big emoji or a voice note, then stars it for the team's know-how.

Your turn

What must an answer never say, and when must your expert send someone elsewhere?

These become fixed rules, and a test your AI must pass every time.

For example: never promise a result; send anyone with pain to a doctor.

One tap. You can change it later.

JOSH · JUNIOR HEATING ADVISOR

The junior hears the coach

The coach's note in her own chat; the junior answers with one tap. Everywhere: a tap on an option, or a practised Take. Nothing to type.

WillpowerLab, for Ember & Air

A homeowner asks about a heat pump. Your advisor answers in their own voice. They get better at it, and your own AI learns from every answer. Click through; the questions on the right shape how we set it up for you.

Your estimate

From your answers (a middle volume until you choose yours). We check it on your first month.

35 questions a month
Middle estimate

About 9 surveys booked
If 1 in 4 who ask book the home heat survey

About 3 installs · £37,500
If 1 in 3 surveys become an install, about £12,500 each with the grant

About 7 sold · £1,043
If 1 in 5 buy the smart thermostat

≈ £38,543 a month

About 3 minutes per answer
Your advisor talks; WillpowerLab writes, sends and follows up

Your advisors sound surer every week
Feedback after every answer, from Will and a speaking coach

Josh answers most questions alone now
Piotr checks the hard ones; a gas smell or a safety
