What someone new will see `showScreen("onb.peek")`

ARIEL'S PHONE · THE APP

Will

Preparing your feedback · Take 1

Something else

"Which of our shops is nearest to them."

They answer by tapping, so I've given it answers. Change them if you like.

This is what someone new will see when they open your chat:

Are you in a hurry?
No · Yes

Which shop is nearest?
Gdańsk · Warsaw · Kraków · Online

Change it

That's right

NOTE
Visitors on your website are asked these same questions (N569 item 3): one setup, not two.

Record Take 2

A VISITOR'S BROWSER · A SKETCH OF INVITA'S SITE

invitaheadspa.com

INVITA

Your model, from your five answers `showScreen("onb.model")`

ARIEL'S PHONE · THE APP

Will

Preparing your feedback · Take 1

From your five answers, here is what it will learn:

Invita's model

The problem

People buy a product that doesn't suit their scalp.

How you solve it today

You ask a few questions and call them back with the one that fits.

It picks from a list

Which of your products fits

It gives a score on a scale

How ready they are to buy, after each call

Change it

That's right

DRAFT · FOR THE FOUNDER'S OK

Will fills the launchpad's Describe and Shape (N566) from the five slides instead of asking: "Your field" and "Worth sharing" answer "What problem should your model solve?"; the rest is a card to confirm. Only for "To share what I know" or "Both".
