YOU

Ember & Air

Ember & Air is an example company: a heat pump installer with about 40 people and three crews. Every question is a lead worth thousands, and the know-how sits in a few senior heads. Five people take part: a customer, a junior who answers, a senior who checks and teaches, the speaking coach (with Will, the AI coach), and the owner.

The customer books

The customer's own question on the right, the answer on the left, and the business's buttons under the message, as WhatsApp Business does. Book and Buy open your own systems.

Your turn

Which booking system do you use, and can it tell us about a booking?

Without it, your expert never learns which answers led to a booking.

- Our job software (Jobber, Commusoft, ServiceM8)
- Calendly
- Another system
- We book by phone

One tap. You can change it later.

A question inside the team

No customer: the junior asks the senior in their chat. A tap, a practised Take, or typing; then the senior stars it, and the team's know-how is written down for the first time.

Your turn

What must an answer never say, and when must your expert send someone elsewhere?

These become fixed rules, and a test your AI must pass every time.

For example: never promise a result; send anyone with pain to a doctor.

One tap. You can change it later.

Your answers stay on this screen; download them at the end.
